Dot-suffixes

`x.nrow`	number of rows in `x` or 0 if a string
`x.ncol`	number of columns in `x` or 0 if a string
`x.size`	number of elements in `x` (=x.nrow*x.ncol) or len of str `x`
`x.sum`	sum of elements in `x`
`x.norm`	L2-norm (RMS) of elements in `x`
`x.min`	minimum value in `x`
`x.max`	maximum value in `x`

Character Set

#	hash	introduces comment
”	quotes	ignore spaces until following ”
\	backslash	ignore this and following characters and concatenate next line
<space>	space	separates arguments in .csm file (except between ” and ”)
0-9		digits used in numbers, names, and strings
A-Z a-z		letters used in names and strings
_ : @		characters used in names and strings
? % =		characters used in strings
.	period	decimal separator (used in numbers), introduces dot-suffixes (in names)
,	comma	separates function arguments and row/column in subscripts
;	semicolon	multi-value item separator
( )	parentheses	groups expressions and function arguments
[ ]	brackets	specifies subscripts in form [row,column] or [index]
{ } < >		characters used in strings
+ - * / ^		arithmetic operators
$	dollar	as first character, introduces a string that is terminated by end-of-line or un-escaped plus, comma, or open-bracket
@	at-sign	as first character, introduces @-parameters
’	apostrophe	used to escape comma, plus, or open-bracket within strings
!	exclamation	if first character of implicit string, ignore $! and treat as an expression
|	bar	cannot be used (reserved for OpenCSM internals)
~	tilde	cannot be used (reserved for OpenCSM internals)
&	ampersand	cannot be used (reserved for OpenCSM internals)
